

Press Release.

1<sup>st</sup> January 2016

Sartorius is pleased to announce that DANDIAG has been appointed as its sole Approved Service Partner for its Laboratory Products in Denmark.

DANDIAG have been approved by Sartorius to provide its full range of services including installation, IQOQ, planned maintenance and repair for all weighing, water and centrifugation products supplied by Sartorius.

This new collaboration follows on from our long and successful partnership in the pipette service field, with DANDIAG well established as Denmark's biggest accredited pipette service operation.

Sartorius's aim has always been to ensure that high quality, local service is available and we feel that in Denmark, DANDIAG can provide the highest level of technical support and service for Sartorius products with of course additional support and training when required from our North European Service Hub, based in Epsom UK.

Our further aim is that with DANDIAG becoming our local Service Hub, our Danish customers should contact DANDIAG directly in the first instance for all service related calls, this being the most efficient way for receiving fast and efficient service.

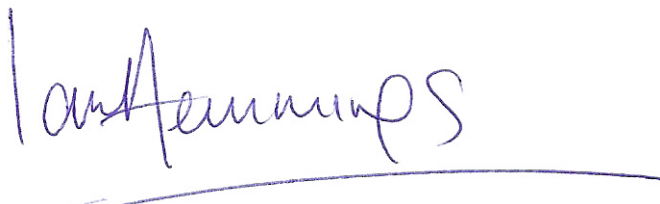

Initially this appointment is for 5 years, to the end of 2020, but we envisage this being a long term partnership that will provide our Danish customers with an ever increasing level of service support.

For any queries relating to this appointment please contact either:

Ian Hemmings, Director of Sartorius Service North Europe  
[ian.hemmings@sartorius.com](mailto:ian.hemmings@sartorius.com) ; 00 44 7896 664052

or Bente Nordbiorg, Managing Director and Owner DANDIAG A/S  
[bnn@dandiag.dk](mailto:bnn@dandiag.dk) ; 00 45 26 30 20 44

Sincerely,

Press Release.

Ian Hemmings  
Director of Service - North Europe  
Sartorius Limited
